次の英文を読み、後の問いに答えよ。

The Suzuki Method is a way to teach children to love and play music. Shinichi Suzuki developed his method after World War II. He felt that after the pain and horror of war, music was (1) ( beautiful / best / children / give / the / to / something / way ) in their lives. Suzuki noticed how children learned language. They did not take classes and could not learn from books at young ages. How did they learn to understand and speak? Children learn language through absorbing sounds from their environment. He thought that teaching music could be done in the same way. By teaching students from a very young age and using smaller instruments for their small hands, they could be taught how to play and love music.

There are several basic ideas that one should follow when using the Suzuki Method. First of all, children need to listen to good music. As Suzuki theorized, children can learn music the same way that they learn language. By listening to good music, they naturally start to (2) pick it up.

Secondly, the method must (3) be initiated at a very young age. Younger people absorb information much easier than older people. This is another way that music is similar to language. The younger a person begins, the easier the process is.

Another belief of the Suzuki Method is that learning music by ( 4 ) is much better than reading notes on a piece of paper. Playing music by ( 4 ) means listening to a song and then repeating what is heard. Suzuki felt that music should be more about sound and emotion.

His next rule was about practice. Practicing on one's own is still very important, but (5) Suzuki students must practice in groups, too. When playing an instrument, musicians rarely play alone. Students can learn from each other, enjoy creating music with other people around them, and improve their playing with the help of others. Actually, the Suzuki Method is not about creating one great musician. Suzuki valued collaboration over competition. He wanted all children to be good musicians working together in harmony instead of competing with each other for a prize.

Suzuki students also always review the songs they have already learned. Since they do not learn how to read music, the children must remember everything. They

have to (6) keep all of the songs in their heads. If they do not review old songs, they may forget. Reviewing simple songs also (7) ( have / how / makes / much / realize / students / they ) improved. New ways to play (8) previously learned songs can be discovered, and this is also an important musical skill to develop.

次の英文を読み、後の問いに答えよ。

Can you imagine your life without any money? Not even a cent, a real, or a peso?  
One man decided to try it out.

Mark Boyle was a successful manager of an organic food company in Ireland. He had a good life. But (1) he worried about the damage humans were doing to the environment. He also believed people bought more things than they needed. Boyle wished we grew our own food and made our own furniture, so we wouldn't waste as much as we do today. So one day, he left his job and started (2) an experiment — could he live for a year without buying anything?

He sold his houseboat and moved into an old mobile home. He got it for free from a website where people give away things they don't want. It wasn't as comfortable as his old place at first, but he soon made it feel like home. He parked it on a farm near Bristol, England. Instead of paying rent, he worked on the farm. He burned wood from the forest to heat his home, so he didn't pay electricity or gas bills. Boyle didn't go shopping, either. He grew his own fruit and vegetables. He also looked for food in the trash cans of supermarkets and cooked it on a wood stove. He made his own toothpaste from fish bones and seeds. To wash his clothes, he used a special type of nut to make soap. Boyle even built his own toilet and used old newspapers from the farm for toilet paper.

He began ( 3 ) again after eighteen months. He says his life change made him feel healthier, happier, and closer to nature. He wrote two books about his experience and used the money to start "The Free House," a farm in Ireland where people can live without money.
